

ICT COFFEE

DECAF SWP

Stock: 9 in stock | **Categories:** [Decaf SWP](#) |

ADDITIONAL INFORMATION

Bag Size	60 Kg Bags
Grade	Org Peru
Farm/Cooperative	Various
Location	Dupuy Jacksonville
Contract	P116811/1
Processing	Fully Washed
Cupping Notes	Mild Acidity, Creamy Body, Citrus, Milk Chocolate, Nutty
Region	Moyobamba, San Martin

ICT COFFEE

The Swiss Water Process is a unique, chemical-free method of decaffeinating coffee. Developed in Switzerland, it relies solely on water, temperature, and time to extract caffeine while preserving the coffee's natural flavor. Green coffee beans are soaked in hot water, releasing caffeine and flavor compounds. This water is then filtered to remove caffeine, and reused to soak new beans. The process relies on osmosis, ensuring only caffeine is extracted, leaving the flavors intact. This method produces decaffeinated coffee that closely resembles the original taste, making it a popular choice for those seeking a high-quality, chemical-free coffee experience.
