

ICT COFFEE

DECAF SWP

Stock: 1 in stock | **Categories:** [Decaf SWP](#) |

ADDITIONAL INFORMATION

Bag Size	60 Kg Bags
Grade	Colombia Excelso EP
Location	RPM New Jersey
Contract	P117807/1
Record Id	339985.0
Farm/Cooperative	Trilladoras de las Coops de Caficultores de Caldas
Altitude	1,300 M
Processing	Fully Washed

ICT COFFEE

Cupping Notes

Mild Acidity, Creamy Body, Milk Chocolate, Lemongrass, Nougat

Region

Caldas

The Swiss Water Process is a unique, chemical-free method of decaffeinating coffee. Developed in Switzerland, it relies solely on water, temperature, and time to extract caffeine while preserving the coffee's natural flavor. Green coffee beans are soaked in hot water, releasing caffeine and flavor compounds. This water is then filtered to remove caffeine, and reused to soak new beans. The process relies on osmosis, ensuring only caffeine is extracted, leaving the flavors intact. This method produces decaffeinated coffee that closely resembles the original taste, making it a popular choice for those seeking a high-quality, chemical-free coffee experience.
